-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "35". Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 2 "the case" has no antecedent basis and it appears should be --a cage--.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deal, III in view of Milligan and Feder. Deal, III shows in Figure 4 a facemask harness 58 for baseball comprising a body 66a, 66b and two side straps 60a, 60b illustrated as stitched to the body. Deal, III does not teach the use of a top strap and the body formed of an inner foam rubber layer and an outer elastic fabric. Milligan in Figure 9 teaches old the use of a top strap 102 to enhance the securing of the facemask. Feder teaches old the use of a body 1 of an inner foam rubber layer neoprene and of an outer elastic fabric (see column 2, lines 18-28) for enhanced frictional engagement with a headgear. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the harness 58 of Deal, III with the top strap 102 of Milligan to achieve the advantage of enhancing the securing of the facemask to a wearer. It would have been obvious to one of ordinary skill in the art at the time of the invention to form the body of the harness of Deal, III of the neoprene and elastic fabric of Feder to achieve the advantage of increasing the friction between the harness and a headgear to enhance the positioning of the facemask. With respect to claim 2 note such teaching of the body as at 8 of Feder. With respect to claim 3 note the hook and loop fastener materials as at 64 of Deal, III.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly, the stitching of Alfaro, Madaus et al. and Seiler, the layered straps of Baker et al. and Meistrell and the top straps of Japanese patent to ASICS, Malcom, Johnstone, Goodman, Lomas and Ogden et al.
